Analysis Cluster / Enable 'module' commands in a R Session

Enable 'module' commands in a R Session

Owned by [Ryan Seaman](#)

Apr 23, 2025 · 1 person viewed

Run the following command

```
1 source("/opt/ohpc/admin/lmod/lmod/init/R")
```

and then you have a new R function called `module()` to use like you would on the CLI.

```
1 module("list")
2 module("avail")
3 module("purge")
4 module("load Software/x.y.z")
```
