Slurm

Owned by Ryan Seaman

LIBR's compute cluster uses Slurm to manage jobs on the cluster. Slurm is an open-source, scalable cluster management and job scheduling system, and is used on about 60% of the largest comput...

Python Modules

Owned by Ryan Seaman

Last updated: Dec 26, 2024 · 1 person viewed

These are the following modules installed on the latest Python module (3.11.5-GCCcore-13.2.0). Standardization is in progress to make this the default for new Python modules going forward as well:

virtualenv

numpy

pydicom

nibabel

Quickstart
